

GLOBAL UTILITIES SUMMIT

The new global home for water utilities

Connect with peers. Discover new ideas. Shape the future of utilities

A global meeting place for the people driving change in water, wastewater and stormwater utilities.

A practical, utility-focused platform for senior decision-makers, innovators and practitioners — built around the challenges and ambitions of utilities.

WHAT THE GLOBAL UTILITY COMMUNITY WILL BE TALKING ABOUT

- Net zero, circular economy & resource recovery
- Climate adaptability, flooding resilience & future water security
- Digital transformation, AI & utility data
- Desalination, low energy & new innovations
- Water reuse, supply diversification & industrial demand
- Customer service & communication
- Nature-based solutions
- Utility leadership, governance & strategic decision-making
- Workforce recruitment, development & retention
- Organisational transformation & future operating models
- Financial resilience, affordability & infrastructure investment

THE SUMMIT

Less presentation.
More utility-to-utility
exchange.
